

CONGRATULATIONS PROBUILD

When ProBuild Lumber located in Visalia, Ca. were ready to upgrade their tractor mount boom truck they turned to the expertise of Coastline Equipment Crane Division and Pape Truck center of Fresno. They were interested in a boom truck that not only could pick up and set their roof trusses atop the highest roof but was also designed to pull a trailer loaded with their trusses. The best choice was a new Manitex 2281T equipped with a 22 ton capacity four section 81' main boom. And with the front bumper mounted hydraulic stabilizer he will be able to pick full capacity of the crane 360 degrees! They could not be more pleased with the machine and look forward to many years of service with their Manitex.
