

CONGRATULATIONS **WEST COAST CASING!**

Being in the oil field industry West Coast Casing relies on the dependability and heavy lifting capacity of their crane trucks. They recently purchased a third Manitex 2281T tractor mount machine. They explained that nothing performs or has the capacities of the Manitex unit. The 2281T has a maximum capacity of 44,000 lbs and equipped with a 4-section 81' telescopic boom and can pick up an astounding 1,380lbs. @ 80' radius! And with the front stabilizer they can pick a load 360 degrees around the truck. They are very pleased with the machine and the staff at Coastline Equipment Crane Division.
