

## **CONGRATULATIONS AAA SERVICES**

When it was time for AAA Services to add to their fleet of Manitex boom trucks they turned to the expertise of Coastline Equipment Crane Division. Being a very successful crane service company in the Central Valley and owning several other Manitex 22101S boom trucks they needed a crane between the 22 ton capacity and 75 ton truck crane capacity range. The Manitex 40124SHL was a perfect fit. It has a 5 section 124' main boom and also a 31' jib. With a tremendous at radius capacity (880 lbs. @ 115') it will handle any job the 22 ton and can't even some of the jobs the 75 ton unit would handle. Teamed with a Kenworth T800 chassis with 485HP they say this package is hard to beat!
