

CONGRATULATIONS LAKE COUNTY SPECIAL DISTRICTS

The time had come for Lake County Special Districts to replace their outdated boom truck. After discussing the application with Coastline Equipment's Crane Division they decided the best fit for them was the Palfinger PK11001 articulating crane mounted on a 2009 Ford F750 chassis. The crane is lightweight offering a great payload capacity and the articulating feature makes it much more versatile than a traditional "stick boom" machine. They also equipped the crane with a 3,300lb hydraulic winch capable of lifting and lowering their largest pumps. They could not be more pleased with the ease of operation and performance of the package.
