

CONGRATULATIONS MAGA TRUCKING

When it was time for Randy Maga to purchase an all terrain crane he turned to the expertise of Coastline Equipment Crane Division and the Tadano product. Being a very successful Trucking and Crane Service Company in Winnemucca Nevada he needed a large capacity machine that was durable enough for the tough conditions of the areas job sites. The Tadano ATF160G-5 (200 US Ton Capacity) was a perfect fit. It has a 6 section 197' hydraulic main boom and a five piece 122' jib for a total tip height of nearly 320 feet! Randy explained he studied and compared other brand units load charts to the Tadano ATF160 but he found that pound for pound this unit was very tough to beat. He could not be more pleased with the unit and the service of both Tadano America and Coastline Equipment.
