

CONGRATULATIONS SIMS METAL MANAGEMENT

When it was time for Sims Metal Management to purchase a rough terrain crane they consulted with Coastline Equipment Crane Division and the top of the line Tadano Product. The machine they chose for the job was the GR500XL-1 with a 50 ton capacity and a main power boom of 108' and 2 pc. 50' lattice type jib. The crane operators all commented on the ease of operation and the roomy operator cab. They also liked the Automatic speed reduction and "soft stop" function of the boom. They couldn't be more pleased with their new machine.
