

CONGRATULATIONS WATER WELL TECHNOLOGY-WELENCO

When it was time for Water Well Technology Inc/Welenco to upgrade their boom trucks they turned to the expertise of Coastline Equipment Crane Division. Being in the water well service industry they needed a crane that not only had a tremendous lifting ability but also to haul the pipe and tooling they needed for the jobsites. Coastline Equipment came up with a very simple cost effective solution and that was the Manitex 26101C. It has a 26 ton maximum capacity and 101' of main boom and with the 29' jib has a tip height of 141 feet! And with the 22' flatbed can haul everything they needed and more. They knew they had found exactly what they needed to take their business to the next level so they purchased two machines!
